

## JD Edward Services

The JD Edwards Practice has developed a strong expertise in Enterprise One and World, with a core experience in Manufacturing & Supply Chain management, Customer Relationship Management, Financial Management, and Human Capital Management suite of products

Today NBNA Systems has a vibrant and sizeable team of JD Edwards consultants working round the clock in various countries providing JD Edwards Finance, Manufacturing, Distribution & Logistics, Technical and CNC expertise.

An added advantage for NBNA Systems customers is the Systems Integration expertise offered along with the ERP Application to ensure a single window responsibility for all components of the ERP Infrastructure.

All consultants have live project implementation experience on JD Edwards ERP suites, Unix/Oracle and NT/SQL platforms.

## Service Offerings / Areas of specialization

### **End-to-End Solution Implementation**

NBNA SYSTEMS consultants with their rich experience provide you with a total ownership experience for JD Edwards solutions. Our highly-skilled application specialists assist you to carry out the entire implementation life cycle successfully, which include Process Mapping, Configuration, Piloting, Testing, Rollout and Support.

### **Integration**

NBNA SYSTEMS's rich experience coupled with a clear understanding of JD Edwards solutions enables us to provide seamless integration with other enterprise business applications. Our consultants have the needed expertise to work with JD Edwards proprietary XPI™ toolset and a variety of middleware tools Such as WebMethods, MicroSoft BizTalk etc.

### **Upgrade & Migration**

NBNA SYSTEMS provides the relevant inputs for impacting cost structures and benefits of upgrading to the clients using older version of JD Edwards. On final conclusions to upgrade we provide "net change" training and evaluate the modifications made in order to determine how best to retrofit them. Our experts assist you to carry out a smooth transition to the upgraded version.

### **Outsourcing Development**

NBNA SYSTEMS's outsourcing model ensures quality, on-time, and on-budget delivery of projects. We drive the complete lifecycle of a project - Understand-Design-Develop-and-Delivery. It is our constant endeavor to provide cost-effective solutions to ensure that our customers meet their business objectives.

Our unique outsourcing model supports the following services:

- 24x7 response center
- Tier 1, 2 & 3 Help Desk
- Application and Report Development
- Application Support
- Configurable Network Computing (CNC)

### **Application Maintenance**

Our Application Maintenance services enable organizations to run their existing applications smoothly. Our in-depth understanding of JD Edwards software allows us to offer you unlimited access to Enterprise Application skills and solutions. Our engagement model enables us to understand your business objectives and presents service delivery mechanisms with external benchmarking and defined service levels.
